IDENTIFIERS *Wisconsin Senior Survey

ABSTRACT

More than 77 percent, or 56,764 of the 73,000 seniors in 96 percent of all Wisconsin schools participated in the 1975 Wisconsin Senior Survey. Designed to provide information for educational planning and employment counseling and to establish a base for follow-up, the survey yielded information related to post-graduation plans and aspirations for work and education. Data were summarized according to several educational levels and by the entire state. The instrument brought together concerns of five state agencies and has potential for application and adaptation in other states. Findings suggest that the instrument helped students think about themselves and their future plans. The survey instrument is included. (Author/RC)

Introduction

The 1975 Wisconsin Senior Survey is an outgrowth of the need for planning information by a number of state agencies. The State Board for Vocational, Technical and Adult Education, the University of Wisconsin System, the Higher Educational Aids Board, the Department of Public Instruction and the Wisconsin Job Service all expressed concern for and interest in preferences of high school seniors for further education, training and work. Additionally, these institutions and agencies were in need of information relative to the preparation and the degree to which they felt competent in specific areas.

The study was organized around the needs of the involved institutions and agencies and conducted by the Center for Studies in Vocational and Technical Education, University of Wisconsin-Madison. In addition to providing a current source of planning information, the study was designed to establish a data base which could be used to compare future similar surveys to establish trends or changes in senior preferences and preparation. The senior survey is planned as an on-going program of information gathering and utilization with new data gathered every 2-4 years.

The data breakouts and comparisons are nearly limitless. For example, separate printouts of raw score information have been made for each local High School, High School District, VTAE District, CESA, and for each Institution of Higher Education in the State. Cross tab information is currently provided for selected questions at the State level only, but nearly any cross tab combination can be obtained depending on the local school or agency needs. The data base will be available for this purpose throughout the coming years.

The information base for the study is comprised of nearly 57,000 1975 Wisconsin Seniors from both public and private schools. Information is being fed back to each of the local schools, thus providing them with the opportunity to make use of the data gathered for the state agencies.

The data base generated by the 1975 Senior Survey will provide many agencies at all levels with countless items of information which will be used in planning and program development in the years to come. With this in mind, the Center welcomes inquiries into the use of the data base and will continue to coordinate access to the information.

Roger H. Lambert
Project Director

Acknowledgements

A study of the magnitude of the 1975 Wisconsin Senior Survey could not have been accomplished without a tremendous amount of cooperation among agencies at all levels. Throughout this study, the working relationship with the state agencies and local school districts was exemplary. The response of nearly 57,000 seniors in Wisconsin is worthy of praise and is the focal point of our appreciation. Without these willing students, the study could not have been undertaken. Likewise, the local school administrators who agreed to become involved and the local survey administrators who shouldered the burden of local survey work deserve a special note of appreciation. Their time and diligence contributed immeasurably to the success of the study.

At the other end of the spectrum are the agencies involved in preparation of the instrument and funding of the project. The Wisconsin Board of Vocational, Technical and Adult Education and the University of Wisconsin System shouldered the major cost of the study while a significant contribution was made by the Higher Education Aids Board and the Wisconsin Department of Public Instruction. All of these organizations provided considerable input into the survey development and the Department of Public Instruction was especially helpful in promoting the survey and contacting local districts.

Special appreciation is extended to Dr. Barbara Thompson, State Superintendent of Public Instruction, whose office endorsed the project and provided formal contact with local district administrators. Gratitude is also extended to Dr. Richard Roth and Tom Diener, Wisconsin Department of Public Instruction, for their efforts in the conduct of the study. Other agency staff were equally diligent in their efforts, notably, Mr. Roland Krogstad and Dr. Sherman Ansell, Wisconsin Board of Vocational, Technical and Adult Education, Dr. Eugene Craven, University of Wisconsin Central Administration, Mr. Richard Johnston, Higher Educational Aids Board, and Ms. Shirley Menigo and Mr. Andrew Helwig of the Wisconsin Job Service.

Printing and processing over 56,000 forms was the responsibility of the Wisconsin State Testing Program. Dr. Kentner Fritz and his staff performed admirably in carrying out their responsibilities. Our gratitude is extended to the Wisconsin State Testing Service for their excellent work and cooperation.

Addition of an expert to any task greatly reduces the frustration and wheel spinning, thus, the involvement of Professor Phillip Perrone, Department of Guidance and Counseling at the Madison campus, significantly reduced the amount of wasted motion on the project. His experience and expertise in the area of surveys, follow-up and analysis of Wisconsin high school populations provided extremely valuable and pertinent direction to the project. His counsel and energies were greatly appreciated. An expression of gratitude is also extended to Dr. M. Douglas Ray, a researcher at the Center, for his input on the analysis and utilization of the data. A special note of thanks is extended to Dr. Dennis Engels, who coordinated the work on the 1975 Wisconsin Senior Survey. His dedication and extra efforts contributed to the excellence of the work accomplished.

Many other people, notably secretaries who mailed materials, persons who tracked down lost surveys at the local schools, and others who contributed ideas through agency representatives remain unidentified but not unappreciated. It is the efforts of these people which make a project of this nature successful and useful for years to come.

SUMMARY OF THE
1975 WISCONSIN SENIOR SURVEY

"1975 Wisconsin Senior Survey," funded by the University of Wisconsin Central Administration; Wisconsin Board of Vocational, Technical and Adult Education; Wisconsin Higher Educational Aids Board; and Wisconsin Department of Public Instruction; staffed by Roger Lambert, Project Director; Philip Perrone, Associate Project Director; Dennis Engels, Project Coordinator.

Summary

Publication of the general report of findings of the 1975 Wisconsin Senior Survey marks the close of the first phase of the study of spring 1975 Wisconsin high school seniors. Subsequent increments of this investigation include, but are not limited to: comparisons with earlier studies at the state and national level, more detailed analyses of current findings, and formal follow-up of a sample of those who responded to this survey. These and many other potential extensions of this first phase are expected to be carried out at the state and local levels.

In cooperation with personnel from several state agencies, Center for Studies in Vocational and Technical Education (CSVTE) staff members constructed and distributed instruments and analyzed and reported findings of the 1975 Wisconsin Senior Survey. Principle factors prompting this investigation included the current tighter job market, the earlier age of majority in Wisconsin and rising concern over the value of higher education. Participating agencies were in need of information about these and related factors in order to more intelligently plan for statewide educational programs and employment counseling service programs.

Design of the survey instrument was based on comprehensive review of pertinent literature, extensive interagency discussion and evaluation and a rigorous pilot study of juniors in seven Wisconsin high schools and first year university and vocational-technical students. By all reports and in view of actual student responses, items on the instrument served to elicit immediate, long range and ultimate post high school educational and vocational preferences, plans and goals. More specifically, seniors were queried as to reasons underlying their aspirations and goals, timing of decisions related to these goals and aspirations, financial means and needs concerning their plans and, finally, their perceptions of how well informed and prepared they were for attaining success and satisfaction in their immediate and distant future endeavors.

Administrators of all of the 499 Wisconsin public and private secondary schools with seniors were invited to have their seniors (approximately 76,000 in the aggregate) respond to questions on the survey instrument. Nearly 96% of all schools and more than 75% of the approximately 73,000 seniors in those schools participated in the survey. Initial survey findings are revealed in the General Report. Data and analyses of the study should prove very helpful in statewide planning for the education of Wisconsin youth and, consequently, for the types of educational institutions, facilities and services required to meet the stated educational needs of those youth. In sum, the data hold a wealth of information for better serving the respondents and those who will follow them in utilizing services of participating agencies and institutions.

Cooperating Agencies and Institutions

Eugene Craven	University of Wisconsin Central Administration
Philip Ferrone	University of Wisconsin-Madison Department of Counseling & Guidance

Goals and Objectives

1. To establish a data base of information about high school seniors' future educational and job plans.
2. To survey the approximately 76,000 high school seniors in Wisconsin in the spring of 1975.
3. To provide breakdowns of data by appropriate municipal and other categorical divisions. (VTAE Districts, Manpower Districts, CESA's, Counties, High School Districts, University Service Areas, etc.)
4. To compare "Trend line data" where possible with the 1958 and 1968 Wisconsin Senior Surveys and the 1971 USOE survey to identify possible new trends or shifts in senior plans for education and jobs.
5. To publish and disseminate a General Report of Findings.
6. To involve the agencies which will eventually use the data in selection and preparation of appropriate questions for the survey. (State Board, University System, Department of Labor, Industry and Human Relations, Higher Educational Aids Board, Dept. of Public Instruction, Private Colleges and Universities, Vocational Advisory Council.)

The 1975 Wisconsin Senior Survey was designed to provide data concerning post graduation plans of all seniors in Wisconsin's public and private high schools, to solicit their opinions of strengths and weaknesses in the high school education they received and to establish a data base for formal follow-up of 1975 seniors.

Participating agencies needed to know the expectations and immediate, long range and ultimate educational and vocational goals of Wisconsin youth; whether significant numbers of high school seniors expected to take advantage of the state's post-secondary educational facilities and programs, post-secondary degree and certificate expectations; timing of decisions made; degree of assurance related to stated plans; students' assessment of the utility

and quality of their secondary school education as related to their future aspirations and goals and in general, seniors' perceptions of situations and circumstances which serve to encourage or discourage, enable or disable, education beyond the secondary level.

Specifically, items on the survey instrument were designed to stimulate and encourage thought about: 1. self and activities beyond high school graduation; 2. alternate choices of activities; 3. statements as to degree of surety; 4. reasons underlying choices of activities; and 5. means or barriers to goal attainment. The instrument constructed for attaining these ends had to represent specific needs of all participating agencies, while promoting a learning experience for seniors. Beyond this goal of attainment of information for planning, needs were perceived for additional planning insight which could be gained by comparisons of data from this survey with similar previous state and national surveys and respective follow-up studies. Accomplishment of all these goals was to happen with the least disturbance to the seniors and those administering the surveys, hence, the decision to arrive at one instrument which adequately represented all participating agencies.

Results and Benefits

Advisory committee members expressed hope that items on the instrument would promote a learning experience for seniors by serving to facilitate thought about self, and future work and educational plans and goals. Findings based on the pilot study and actual administration of the instrument revealed that this hope was realized and that items on the instrument did, indeed, help seniors think about themselves and their future plans. Moreover, while meeting informational needs of five agencies, the instrument did not aggrevate students by raising irrelevant, unnecessarily personal or otherwise offensive questions. This final statement bespeaks the potential value of the 1975 Wisconsin Senior Survey instrument for similar uses or adaptation at the local level and in other states.

Returns constitute a usable base of information for planning. Analysis of the high schools and students represented in the survey suggests that all areas of the state, all general community sizes, all ethnic groups, and all public and private schools are proportionally represented in the response group. This assessment is substantiated by the size of the respondent groups by high school and within high school, as compared with the total size of senior classes in all high schools of the state.

Data collected will be used for evaluating and planning secondary and post-secondary educational programs at the state and local level and for planning employment counseling. While the General Report of Findings represents only a small portion of the data, the value of the information is apparent even in this limited form. Responses to questions about such specifics as the optimal age for required school attendance and first and second choices of post secondary schools speak for themselves as useful sources of information. Crosstabs and other comparisons in the report yielded information which could only be speculated about prior to the survey.

Beyond these immediate results and benefits at the close of the first phase of this survey lie future follow-up studies of samples of 1975 respondents and comparisons with similar state and national studies. Numerous possibilities exist for further use of the data at the state and local level.

By all indications, seniors benefitted in the form of additional introspection and insight from the experience of completing the instrument. Participating agencies and schools benefitted immediately from the assistance afforded them by the raw data and initial analysis. To the extent that subsequent phases of inquiry emanate and flourish, potential benefits appear sizeable, especially because this entire effort has provided educational planners, teachers and administration and vocational counseling planners with the commodity they need most--information from those whom the planners and practitioners are obligated to serve--Wisconsin's young adults.

Survey Procedures

Personnel from each of the participating agencies were involved in all phases of the survey, from formulation of goals, through construction of the survey instrument, to analysis of the data and subsequent planning based on the findings. Members of the Advisory Committee worked within their own agencies to elicit agency consensus regarding goals, objectives and priorities for the survey. They also headed intra-agency reviews of past Wisconsin and United States Office of Education survey instruments in seeking agency thoughts and desires regarding construction of the instrument for the 1975 survey. At the same time, personnel reviewed pertinent literature and visited individually with agency personnel and committee members. This done, committee members came together to represent agency concerns, iron out differences and arrive at a common base of understanding about the study and a set of mutually acceptable goals and objectives.

While advisory committee members were primarily involved in constructing the survey instrument and utilizing findings for their own planning needs, they were kept abreast of all project developments and they contributed their expertise over the entire course of this first phase of the survey. The excellence of advisory committee contributions to the value of the study in the form of 31 formal revisions of the survey instrument speaks for itself. Almost without exception, too, students and staff members of participating schools were extremely cooperative, careful and timely in accomplishing their tasks. Scoring, printing, analysis and initial reporting of findings occurred as scheduled.

Overall, then, staff and committee activities were intense across the entire year. From thorough planning, instrument construction, printing and piloting, notice to school administrators and shipment of materials; through survey returns, follow-up of delinquent returns, scoring and printouts, analysis and reporting; to dissemination of data and findings; project staff and Advisory Committee members attended to the major and minor decisions. Their attention led to the excellent overall results experienced in this ambitious and highly successful research venture.

Publications

Foreword and Printouts of Data by: School Building, school Districts, Cooperative Educational Service Agencies (CESA), VTAE Districts, Post-Secondary Institutions, June 1975.

General Report of Findings of the 1975 Senior Survey, Lambert, Perrone, and Engels, June 1975.

DATA BASE

Instrument Construction and Sequence of Administration

In February, 1975, administrators in all 499 public and private Wisconsin high schools with seniors were invited to permit seniors in their schools to participate in the 1975 Senior Survey. Authorities in all but three schools accepted this invitation and selected one week (from a range of five weeks - mid-March through mid-April) for administration of the survey in their schools.

The survey instrument was developed by a team of representatives from all sponsoring agencies, the Center for Studies in Vocational and Technical Education (CSVTE) and the Department of Counseling and Guidance, University of Wisconsin-Madison. Agencies prioritized their concerns and came together to ascertain common needs and work out disagreements in arriving at a mutually acceptable instrument. After extensive discussion and revision, that instrument was used in a pilot study in classes of juniors at seven Wisconsin high schools and with first year students at Madison Area Technical College and the University of Wisconsin-Madison.

Final revision based on pilot findings yielded what agency representatives and survey staff deemed an appropriate instrument. By all reports from pilot participants and those who administered the actual survey, items on the instrument served to stimulate thought about self and to elicit immediate, long range and ultimate post high school educational and vocational preferences, plans and goals. Out of respect for the personal dignity of survey respondents and in view of current educational privacy legislation (e.g., PL 93-380, the Family Rights and Privacy Act, and Chapter 254 of the 1973 Laws of Wisconsin pertaining to student records), every effort was made to avoid any irrelevant, unncessarily personal or otherwise objectionable or offensive questions.

Necessary materials (instruments, accompanying letters, administration instructions and a return mailing label) were mailed to the survey administrator delegated by school authorities at each high school. During April, 1975, returns were received from more than 80 percent of all Wisconsin schools with seniors. Returns from the other participating schools arrived between May and the beginning of June, 1975.

Response

Seniors in nearly 96 percent of all Wisconsin schools (411 of 426 public and 67 of 73 private schools) participated in the survey. The more than 56,000 respondents represent more than 77 percent of all seniors enrolled at participating schools in spring 1975. In view of the fact that responding schools (96 percent of all schools) contained 96 percent of available high school seniors, it appears that school size was not a source of response bias. Frequency distributions of all schools and responding schools by size of senior class are illustrated in Table 1. Almost without exception, authorities at non-participating schools reported that they elected not to participate because they could not find time to administer the survey without unduly inconveniencing their seniors, especially because seniors in their schools had already participated in many surveys.

Reports of Findings

Data from the survey are reported item by item in percentage and numerical figures, except for two items (Numbers 4 and 31) which are not machine scorable. To retain confidentiality of senior identities, no data are available for individual respondents, but summaries of data for groups of respondents are available (these summaries are described in detail in the pages entitled "Available Printouts and Procedures for Securing Additional Information").

Limitations

When interpreting survey data, it is imperative that the following limitations and other potentially influencing factors be borne in mind: 1. less than one hundred percent of Wisconsin schools with seniors participated in the survey; 2. less than one hundred percent of the seniors in participating schools responded, thus, there is no absolute guarantee that the data truly present an accurate description of responses of all seniors; 3. the fact that seniors in different schools responded at proximate but different times in the spring may have influenced responses; 4. while administrative instruments were prepared and distributed by the Center, local administrators were free to administer the survey in small or large groups and according to such other nuances as to possibly influence or otherwise affect survey findings; 5. as in all questionnaire and survey research, veracity and earnestness of respondents is assumed, but in no way guaranteed.

Controls

Safeguards were employed to meet each of these potential limitations. Every attempt was made to insure participation by all Wisconsin high schools with seniors. A cooperative effort by five major state agencies instead of individual survey efforts by those agencies was viewed as a strong factor in obtaining a high rate of participation. Telephone follow-up of schools which were delinquent in returning completed instruments was most comprehensive and systematic. Delinquent schools were called weekly until such time as materials were received or school officials indicated unwillingness or inability to administer the survey.

In view of precedent (the 1958 and 1968 Wisconsin Senior Surveys) and based on the assumption that seniors experience considerable need for thinking about, planning and/or finalizing plans for their futures during the spring of their senior year, that season was selected as most appropriate for conducting the survey. Presenting administrators with a five-week period from which they could select one week for administration seemed a practical way to increase returns and ease the burden of scheduling the survey while keeping the time of senior response within tolerable limits of proximity between schools.

Administrative instructions were explicit, as attested to by the fact that only three local survey administrators requested interpretation of the instructions. Because completion of the instrument was not dependent on time and the sole requirement for respondents was careful reading and honesty, the intentional provision of flexibility for local administration appears a very

minor limitation of the survey results. While respondent veracity and earnestness can only be hoped for, seniors were told: that their opinions were valuable to the State agencies sponsoring the survey, that the survey was not a test, that no one at the local school would be able to see their individual responses and that their responses could in no way influence their grades. Attempts have been made, then, to address and overcome each potential limitation. There is, however, no total safeguard, no guarantee, that these and other limitations have been controlled or eliminated. The reader should interpret the findings accordingly.

TABLE I

FREQUENCY DISTRIBUTION OF WISCONSIN HIGH SCHOOLS BY SIZE OF SENIOR CLASS AND FREQUENCY DISTRIBUTION OF SCHOOLS RESPONDING TO SURVEY BY SIZE OF SENIOR CLASS

Size of Senior Class	Distribution of Wisconsin High Schools		Distribution of Respondent High Schools in Survey	
700 and Over	5	(1.0%)	5	(1.0%)
601 - 700	8	(1.6%)	8	(1.7%)
501 - 600	19	(3.8%)	19	(4.0%)
401 - 500	17	(3.4%)	15	(3.1%)
301 - 400	31	(6.2%)	28	(5.8%)
201 - 300	50	(10.0%)	50	(10.5%)
101 - 200	134	(26.9%)	129	(27.0%)
Less than 100	235	(47.1%)	224	(46.9%)
TOTAL	499	(100.0%)	478	(100.0%)

INTERPRETING DATA PRINTOUTS

To give the reader an appreciation of the context in which the survey developed and data were collected and as a background for interpretation of the data on the attached printout, it is recommended that the "Introduction" and "Summary" sections be read prior to looking at the printout. Reading the "Letter to Seniors" should further enhance the reader's background.

Because the attached printout contains summaries of responses to specific items on the survey instrument, constant reference to the survey instrument, itself, is vital. It is recommended that users of this data read each item on the instrument prior to attempting interpretation of the printout of that specific item.

Printouts by School

While every effort has been made to produce a printout which is self-explanatory, the following remarks and illustrations regarding specific details of the printout are presented to facilitate reading and understanding the data.

On each page of the printout, the first two lines serve to identify respective groups of respondents by building, school district, county, CESA district and VTAE district. The following is presented to illustrate the coding system:

Abbotsford High School = 15 06 10 0007 040

This encoded information is decoded as follows:

VTAE District 15 = North Central Technical Institute, Wausau

CESA District 06 = Cooperative Educational Service Agency No. Six

County 10 = Clark

School District 0007 = Abbotsford

School Bldg. 040 = Abbotsford High School

Figures 1, 2, and 3 depict the county, CESA and VTAE boundaries and code numbers.

On line three of the printout, the total number of students who completed and returned survey instruments appears to the right of the phrase "Total Number of Surveys in School = ." Because the number of respondents may vary for different sections of the survey instrument, each item on the printout lists the number of seniors who completed the section in which that item occurs. For each item, then, the number of respondents appears on the same line as the

item number. This number of respondents is then broken down according to all possible responses for the item including, where appropriate, the number of invalid responses or non responses for that item.

In reading the printout, it is most important to keep in mind the total number of seniors enrolled at the school. The number of respondents will never be greater than the actual number of enrolled seniors. To the extent that the number of respondents is smaller than the number enrolled, responses indicated on the printout may not accurately represent all seniors at the school. In this regard, the reader is advised to read the attached pages entitled "Data Base", for a fuller description of the data.

Responses to survey items are printed in raw score and percentage figures. On the fourth line of the printout, for example, the number printed to the right of the word "Sex" tells the reader how many seniors responded to the question on sex. On the fifth line of the printout, the word "male" is followed by the number of students who marked that response. The percentage figure immediately to the right of that reported number of males represents the percent of seniors at a school (or group of schools) who marked "Male" on that item. The same format is used for reporting the number and percent of females. Finally, the number and percent (if any) of invalid responses are listed to the right of the response category abbreviated, "inv. resp.", with the number followed by the percent. Throughout the printout, the same sequence (response category on the left, succeeded by the number and then the percent) is followed.

Item number one serves to illustrate two additional points of clarification for reading the printout. In the printout of data for item one, the term "no answer" is followed by the number and percent (if any) of seniors who did not respond to item one in spite of the instruction that they should respond. To the right of that "no answer" term in item one, the words "Multiple Response" are followed by the number and percent (if any) of people who marked more than one of the responses, in spite of the instruction that only one response should be marked. Throughout the printout, the word "none" appears to the immediate right of an item or response on the printout when no one marked that respective item or response.

Data for items 24 and 25 have been combined on the printout for ease of reading and to save space. Figures under the terms "first choice" and "second choice" indicate the respective number and percent of people who marked the school listed on that same line as their first or second choice. In item 30, it is important to remember that multiple responses were permitted and, therefore, the total percentage may exceed 100%. Responses to items 4 and 31 are not reported because those items are not machine scorable.

If you have any questions or desire further explanation of the printouts, call or write Dennis Engels or Roger Lambert at the Center for Studies in Vocational and Technical Education, 321 Old Education Building, University of Wisconsin, Madison, Wisconsin, 53706, telephone number 608/263-3696. While we are not allowed to accept collect calls, we will return any calls.

AVAILABLE PRINTOUTS AND PROCEDURES FOR SECURING ADDITIONAL INFORMATION

Printouts of data have been completed which summarize total responses according to the following levels:

1. school building;
2. school district (for districts with more than one high school);
3. Cooperative Educational Service Agency (CESA);
4. Vocational, Technical and Adult Education (VTAE) district;
5. post secondary institution selected; and
6. by the entire state.

Summarizing data according to these agencies and institutions seemed an appropriate means of managing the information in a manner which best informs those agencies and institutions which need to use the data. In selecting the school building as the smallest unit of summary, confidentiality of subjects' identities was assured while meeting the need for description and planning at the local level. For school districts with multiple high schools, the rationale for printing data by district appears self-evident. CESA and VTAE boundaries were selected for their logical geographic breakdowns which afford a sense of proportion and comprehension to the data summaries. Printouts of data by post secondary school selected (first or second choice) were designed to serve informational and planning needs of those institutions and to afford insight into factors related to selection of post secondary education. Finally, a statewide summary of raw data was prepared to address the major goals of the survey.

Distribution

Copies of each of these printouts were distributed according to the same rationale. Beyond this, all participating agencies and schools received the General Report of Findings of the 1975 Wisconsin Senior Survey. In view of current funding, additional copies of these reports and additional analyses in the form of other printouts of data are available from the Center on a cost recovery basis.

Costs for Additional Printouts

While costs for additional copies of the General Reports or for other desired analyses and printouts are not currently available, approximate rate quotations can be obtained upon request. It is worthy of note that expenses for further analyses are relatively minor when compared with such large and major expenses as collection, scoring, etc. Additional comparisons in the form of introspection by item (crosstab) to identify complex analyses impossible by simply looking at total group figures, typically require only minimal program changes and computer time; so costs need not be excessive. Costs also vary according to such factors as the number of respondents, number of copies desired, and mailing and handling costs. Schools which have computers may desire to purchase a copy of the computer tape containing data from their seniors. No seniors are identified in any way on these tapes, but they do contain all the data for a school. These tapes are available at cost plus handling and shipping charges. Write Roger Lambert or Dennis Engels at the Center for further information.

CENTER FOR STUDIES IN VOCATIONAL AND TECHNICAL EDUCATION
UNIVERSITY OF WISCONSIN-MADISON, 964 EDUCATION BUILDING, 1025 WEST JOHNSON STREET, MADISON, WISCONSIN 53706, TEL 608-263-3696

TERMS FOR USE OF DATA FROM THE 1975 WISCONSIN SENIOR SURVEY

This agreement is between the University of Wisconsin-Madison Center for Studies in Vocational and Technical Education ("Center") and _____ _____("User") for the transfer to and use by User of information obtained from Wisconsin high school students through a survey instrument known as "The 1975 Wisconsin Senior Survey."

The parties hereto realize that restrictions herein may impose cost, time and manpower burdens on those persons or agencies using Senior Survey data. The parties realize that the concern of the public at large for individual privacy and recent legislation regulating many data collection and dissemination systems to curb abuses mandate that careful safeguards be placed on the collection of personally identifiable information elicited through the Senior Survey in order to protect the privacy of the respondents. The usefulness of Senior Survey data is considerable. The parties believe that the best way to insure that such Senior Surveys may continue to be undertaken in the future is to adhere to high standards of confidentiality and responsible dissemination of survey results.

In consideration of the transfer by the Center to User of personally identified information obtained from the 1975 Senior Survey, User hereby agrees:

1. That User, its officers, employees, or agents, shall not disclose to any person any of the Data in personally identifiable form or in such form as would reasonably permit personal identification (statistical disclosure) of any respondent. This paragraph shall not operate to prohibit disclosure of personally identified information contained in Data to officers, employees or agents of User for the sole purpose of analyzing the Data prior to publication of the results of such analyses, provided that such analyses do not contain personally identifiable information.

2. That the User shall (a) identify one person immediately responsible for safeguarding the data; (b) take reasonable precautions to protect the data from any anticipated threats or hazards to its security; and (c) take affirmative action to communicate these safeguard requirements to any of its employees, officers or agents who are granted access to the Data in personally identifiable form.

3. That User shall contact the Center prior to planning follow-up studies based upon the Data in order to insure that systematic follow-up on a formal basis by the Center is not jeopardized. Because follow-up is expensive, complicated and delicate, the Center shall be the coordinating unit for all follow-up studies based upon the 1975 Senior Survey data.

4. The User shall attach the following statement to any communication, report or other study based upon the Data: "Data used in preparation of

this document were secured for the Center for Studies in Vocational and Technical Education, University of Wisconsin-Madison. Conclusions or opinions contained herein do not necessarily represent conclusions or opinions of the Center, the University of Wisconsin-Madison or agencies which funded the 1975 Wisconsin Senior Survey."

5. The User shall submit to the Center two copies of all reports or other studies produced by User based upon the Data.

6. Release to User of information by school building or school district is for use by User on an internal basis only. User must obtain the expressed written consent of the district administrator of any school building or district prior to User's release of any published or otherwise circulated comparisons, evaluations or other descriptions of data which provide or enable comparison of school buildings or districts. Moreover, that User shall exercise discretion when using aggregated data by school building or district where there is a possibility of identifying the institution or its students or causing unfair comparisons with other educational units.

CENTER FOR STUDIES IN VOCATIONAL AND TECHNICAL EDUCATION
UNIVERSITY OF WISCONSIN–MADISON, 321 EDUCATION BUILDING, 1000 BASCOM MALL, MADISON, WISCONSIN 53706, TEL: 608-263-3696

Dear Senior:

In a few months you will be leaving high school to begin a new phase in your life. You may be going on to more schooling, taking a job, starting a home, joining the military or perhaps just loafing for a while. Whatever you decide to do, we are interested in learning about your plans for the future.

The 1975 Wisconsin Senior Survey, which you are being asked to complete, has brought together in one short form, questions of the University System, the Vocational-Technical System, the Employment Service, the Higher Education Aids Board and the Department of Public Instruction. People from these agencies are responsible for educational programs and job counseling services and will use your answers to improve many kinds of opportunities for you and the students who will follow you.

We are asking you about your interests and opinions and your hopes for the future. The information you and 82,000 other Wisconsin high school seniors share with us will be pooled for use in planning by these agencies By answering these questions, you can greatly help to make this planning worthwhile.

Students who helped develop the questionnaire reported that the questions helped them think about themselves and their future plans. We hope the questions will help you in the same way.

This is a survey, not a test, so there are no right or wrong answers. Your answers will not be given to anyone at your school and cannot affect your grades. Please answer the questions as well as you can.

We ask for your name, address, and Social Security number for use only so we can contact you again after you graduate. Your experiences and feelings about your education are very important to those of us who are interested in assuring the fullest possible development of opportunities for Wisconsin's young men and women. We respect what you have to say and thank you for helping us with this important study.

I personally wish you good fortune as you graduate from high school.

Best wishes,

Roger Lambert

Roger Lambert
Associate Director

USE THIS LIST TO ANSWER QUESTION # 1

CAREERS NOT DONE FOR PAY such as homemaker, traveler, volunteer, etc.
AGRICULTURE, AGRIBUSINESS AND NATURAL RESOURCES such as botanists, cattlemen, crop scientists, dairy farmers, gardeners & groundskeepers, horticulturists, lumbermen, nurserymen & landscapers, soil scientists, zoologists.
BUSINESS AND OFFICE such as accountants, bookkeeping machine operators, economists, executives, legal secretaries & stenographers, shorthand reporters, systems analysts, typists.
COMMUNICATION AND MEDIA such as book editors, broadcast technicians, commercial and industrial photographers, free lance writers, literary agents, magazine editorial workers, newspaper editors, press photographers, proofreaders, reporters.
CONSTRUCTION such as asbestos & insulation workers, bricklayers, building contractors, carpenters, cement masons, civil engineers, electricians, glaziers, iron & steel workers, lathers, painters, plumbers & pipefitters, roofers, structural iron workers.
CONSUMER AND HOMEMAKING EDUCATION such as bakers, bus boys, cleaning & dyeing workers, dieticians, fashion designers, home economists, household workers, interior designers, sewing machine operators, upholsterers.
ECOLOGY AND ENVIRONMENT such as geographers, meteorologists, pest control operators, wildlife managers.
FINE ARTS AND HUMANITIES such as actors, anthropologists, cartoonists, composers, dancers, historians, models, performing musicians, playwrights, radio & television announcers, script writers, translators, and interpreters.
HEALTH OCCUPATIONS such as anesthesists, chiropractors, dental assistants, dental hygienists, dentists, hospital attendants, licensed practical nurses, medical lab assistants, opticians, pediatricians, pharmacists, physicians, psychologists, registered nurses.
MANUFACTURING such as aerospace, engineers, air conditioning & refrigeration engineers, atomic energy technicians, boilermakers, draftsmen, electronic technicians, factory inspectors, foundry workers, machinists, millrights, nuclear engineers, shipbuilders, tool & die makers, welders.
MARINE SCIENCE such as divers, oceanographers, marine biologists, marine geologists.
MARKETING AND DISTRIBUTION such as advertising account executives, advertising copywriters, automobile salesmen, buyers, delivery route salesmen, department store salespeople, display workers, florists, general merchandise salespeople, insurance agents, marketing research workers, purchasing agents, securities salesmen.

SEX: ○ MALE ○ FEMALE

How do you describe yourself?
- ○ American Indian or Native American
- ○ Black, Afro-American or Negro
- ○ Mexican-American, Chicano, Spanish Surname, Puerto Rican, Cuban or Latin American
- ○ Oriental or Asian American
- ○ White or Caucasian
- ○ Other

1. MY CAREER GOAL: As you see the future, which ONE major career area listed below is closest to your career goal? (Mark ONE major career area – if you are not sure, make your best guess. Additional information for each career area is listed on the attached information sheet.)
   - ○ CAREERS NOT DONE FOR PAY
   - ○ AGRICULTURE, AGRIBUS. AND NATURAL RESOURCES
   - ○ BUSINESS AND OFFICE
   - ○ COMMUNICATION AND MEDIA
   - ○ CONSTRUCTION
   - ○ CONSUMER AND HOMEMAKING EDUCATION
   - ○ ECOLOGY AND ENVIRONMENT
   - ○ FINE ARTS AND HUMANITIES
   - ○ HEALTH OCCUPATIONS
   - ○ MANUFACTURING
   - ○ MARINE SCIENCE
   - ○ MARKETING AND DISTRIBUTION
   - ○ PERSONAL SERVICES
   - ○ PUBLIC SERVICE
   - ○ RECREATION AND HOSPITALITY
   - ○ TRANSPORTATION

2. When did you decide that this career goal is best for you? (Mark one)
   - ○ during the last 3 months
   - ○ 3 to 6 months ago
   - ○ in 10th or 11th grade
   - ○ in 9th grade or earlier

3. How sure are you about the career goal you marked in question No. 1?
   - ○ quite sure
   - ○ generally sure
   - ○ generally unsure
   - ○ quite unsure

4. What is the title of the specific job you want in the future? (If not sure make your best guess. Print below)

5. Which ONE of the following best describes what you will be doing next year? (Mark one circle.)
   - ⓐ travel or loaf for more than a summer
   - ⓑ begin full time military service
   - ⓒ become a homemaker
   - ⓓ begin a full time paying job
   - ⓔ begin an apprenticeship or on-the-job training program
   - ⓕ attend a PUBLIC vocational-technical school
   - ⓖ attend a PRIVATE vocational or trade school
   - ⓗ attend a PUBLIC college or university
   - ⓘ attend a PRIVATE college or university

6. If more than one of the above activities applies to you next year, mark additional appropriate letters from question No. 5 here: ⓐ ⓑ ⓒ ⓓ ⓔ ⓕ ⓖ ⓗ ⓘ

7. How sure is the plan for next year which you marked in question No. 5?
   - ○ quite sure
   - ○ generally sure
   - ○ generally unsure
   - ○ quite unsure

8. When did you decide on the activity you marked in question No. 5?
   - ○ during the last 3 months
   - ○ 3 to 6 months ago
   - ○ in 10th or 11th grade
   - ○ in 9th grade or earlier

9. Will you do this activity in Wisconsin? (Guess, if not sure)
   - ○ yes
   - ○ no

10. Rate how well you feel your high school prepared you to use the following skills in the activity you marked on question No. 5. (Mark one circle for each skill)

	Good	Average	Poor	Does not apply to me
Mathematics	○	○	○	○
Science	○	○	○	○
Speaking	○	○	○	○
Writing	○	○	○	○
Foreign languages	○	○	○	○
Vocational skills	○	○	○	○

11. Did concern about money influence your plans for next year?
   - ○ yes
   - ○ no

If you answered "yes," answer question No. 12; if you answered "no," move to No. 13.

12. What would your choice of activities for next year have been if money had not affected your decision? (Mark ONE letter from question No. 5 here which best describes what your choice would have been) ⓐ ⓑ ⓒ ⓓ ⓔ ⓕ ⓖ ⓗ ⓘ

NCS Trans-Optic F2519-54321

13. What is your best guess of the amount of money you will earn per year when you first ENTER the career field you marked in question No. 12 (Mark one; if you are not sure, make your best guess)

ⓐ $2,000 or less
ⓑ $2,001 to $4,000
ⓒ $4,001 to $6,000
ⓓ $6,001 to $8,000
ⓔ $8,001 to $10,000
ⓕ $10,001 to $12,000
ⓖ $12,001 to $14,000
ⓗ $14,001 to $16,000
ⓘ $16,001 to $18,000
ⓙ $18,001 to $20,000
ⓚ $20,001 or more

14. Which of the responses in question No. 13 do you think best describes the HIGHEST yearly income you ever expect to earn? (Mark the appropriate letter from question No. 13 here. If you are not sure, make your best guess.)

ⓐ ⓑ ⓒ ⓓ ⓔ ⓕ ⓖ ⓗ ⓘ ⓙ ⓚ

15. How useful have the following been in helping you decide what you will do next year? (Mark one circle for each resource)

RESOURCE	no contact with this resource	Usefulness: very helpful	some help	no help
High school counselors	○	○	○	○
High school teachers	○	○	○	○
Wis. State Employment Service	○	○	○	○
Professional associations and trade unions	○	○	○	○
Family members and relatives	○	○	○	○
Friends	○	○	○	○
College or vocational school representatives	○	○	○	○
Military recruiters	○	○	○	○
School catalogues or bulletins	○	○	○	○
Newspapers	○	○	○	○
Pamphlets or brochures	○	○	○	○
TV and radio	○	○	○	○
People in the activity I plan on	○	○	○	○
Visits to school or job site	○	○	○	○
Career materials in high school (films, tapes, slides)	○	○	○	○

16. Which counseling and guidance services do you think you might want or need in the future? (Mark all that apply to you)

○ counseling in financial and money matters.
○ counseling in personal, social matters.
○ counseling in career opportunities and career planning.
○ counseling in educational and training opportunities.
○ counseling to help in finding a job.

17. My high school program was mainly: (Mark one)

○ a vocational-technical or job oriented program
○ a college preparatory program
○ a general program (one not aimed at college or vocational preparation)

PLEASE DO NOT WRITE IN THIS SPACE

18. Have you participated in the following high school activities? Would you like to participate in similar activities in the future? (Mark one or both circles for each area which applies to you)

	Have participated	Would like to participate in the future
ATHLETICS - school teams, intramurals, sport club, cheerleader, etc.	○	○
ACADEMIC ACTIVITIES - debating, drama, band, honorary clubs, school newspaper, yearbook, etc.	○	○
LEISURE, HOBBY OR CRAFT ACTIVITIES - hobby clubs such as photography, model building, hot rod, electronics, crafts, etc.	○	○
VOCATIONAL EDUCATION ACTIVITIES - FFA, DECA, OEA, FBLA, VICA, FHA, FTA, etc.	○	○
OUT OF SCHOOL ACTIVITIES - 4-H, Junior Achievement, church groups, scouting, etc.	○	○

19. My grade average in high school was:

○ A (93 - 100)
○ B (85 - 92)
○ C (72 - 84)
○ below C (below 72)

20. Answer each of the following statements about your high school. (Mark one circle for each statement)

	Strongly agree	Generally agree	Generally disagree	Strongly disagree
School helped me see the importance of developing my abilities and talents	○	○	○	○
School placed enough emphasis on vocational and technical programs	○	○	○	○
School offered enough practical experience	○	○	○	○
School helped me learn about myself	○	○	○	○
School prepared me in "how to find a job"	○	○	○	○
School provided adequate career counseling	○	○	○	○
School helped me achieve an understanding of social, political, and economic problems	○	○	○	○
School helped me become more aware of my responsibility as a citizen	○	○	○	○
This school should prepare students to find jobs	○	○	○	○

1975 WISCONSIN SENIOR SURVEY
Center for Studies in Vocational & Technical Education
University of Wisconsin – Madison

21. Suppose you were not going on to further schooling. Here are some reasons others have given for not going on to more schooling after they leave high school. Which of these reasons apply to you or could apply to you? (Answer whether you are going on to school or not. Mark the circles beside all reasons that apply to you or could apply to you.)

- ○ I do not have enough information about how to get into college or vocational school.
- ○ I do not think I have enough money to go to college or vocational school.
- ○ I do not think I have the right high school credits to get into college or vocational school.
- ○ I was not accepted at one or more colleges or vocational schools.
- ○ The college or vocational school I want to attend is not close enough to my home.
- ○ My teachers or counselors discouraged me from going to college or vocational school.
- ○ My parents discouraged me from going to college or vocational school.
- ○ I need to earn money to support my family.
- ○ I need to earn money so I can pay to go to school in the future.
- ○ My scores on college or vocational school admissions tests were too low for me to get in.
- ○ I am waiting to enter the armed services.
- ○ I plan to be married.
- ○ School is not for me; I don't like it.
- ○ I'd rather get a job now.
- ○ My high school program prepared me for a job.
- ○ Education after high school is not worth the time and cost.

22. If you had to get more schooling after high school, which of the following would it be? (Mark one)

- ○ college or university
- ○ vocational or technical school
- ○ the job training program
- ○ apprenticeship program
- ○ other, please specify:

PLEASE DO NOT WRITE OUTSIDE THE ABOVE AREA

23. Until what age should people be required by state law to attend high school?

- ○ age 15
- ○ age 16
- ○ age 17
- ○ age 18

PLEASE READ INSTRUCTIONS BEFORE GOING ON

ANSWER THE FOLLOWING QUESTIONS IF YOU PLAN FURTHER EDUCATION ANY TIME IN THE FUTURE, INCLUDING ANY DAY, EVENING OR CORRESPONDENCE CLASSES. (IF YOU DO NOT PLAN TO GO ON TO SCHOOL ANY TIME IN THE FUTURE, SKIP TO QUESTION NO. 44.)

24. If you plan to attend college or vocational school or other form of educational program, what school do you plan to attend? (If you are not sure, make your best guess) Print the code number from the attached list of schools at the top of the box and mark the circles below.

25. If you have to change your plans, what is your second choice? Print the code number from the attached list of schools at the top of the box and mark the circles below.

26. How sure are you of the choice marked in No. 24?

- ○ quite sure
- ○ generally sure
- ○ generally unsure
- ○ quite unsure

27. When did you decide to go to school beyond high school?

- ○ in the past 3 months
- ○ 3 to 6 months ago
- ○ in grades 10 and 11
- ○ 9th grade or earlier

28. When do you expect to enter the school you will attend after graduation from high school? (Mark one)

- ○ Summer 1975
- ○ Fall 1975
- ○ Winter or Spring 1976
- ○ later

29. How will you enroll in the course of study you plan on taking? (Mark one; if you are not sure, make your best guess.)

- ○ regular classes, full time
- ○ regular classes, part time
- ○ evening or weekend courses
- ○ correspondence/home study

30. I selected the school(s) named above or I will select a school in the future because: (Mark ALL reasons which were Most Important in helping you make up your mind.)

- ○ parents and relatives favored this choice
- ○ friends favored this choice
- ○ counselors and teachers favored this choice
- ○ I favored this choice
- ○ school is close to home
- ○ school is far from home
- ○ school is small
- ○ school is large
- ○ course offerings
- ○ extracurricular activities offered
- ○ scholastic standards
- ○ school reputation

31. Which college major or vocational program are you most interested in? (Please print in the box below)

PLEASE DO NOT WRITE OUTSIDE THE ABOVE AREA

32. What is the usual length of the program you plan to enter after high school graduation? (If not sure, make your best guess)

- ◯ less than 6 months
- ◯ about 1 year
- ◯ about 2 years
- ◯ about 3 years
- ◯ about 4 years
- ◯ more than 4 years

33. How long do you think it will actually take you to complete that schooling? (You may, for example, be thinking about entering school, then stopping out for a while, then returning. If you are not sure, make your best guess. Mark one circle.)

- ◯ less than 6 months
- ◯ about 1 year
- ◯ about 2 years
- ◯ about 3 years
- ◯ about 4 years
- ◯ more than 4 years

34. No matter when you plan to enter school, how much do you expect to spend per year for all living costs, including room and food, recreation, clothes, transportation, tuition, fees and books? (Mark the amount which comes closest to your best guess.)

- ◯ less than $1,500
- ◯ $1,501 to $2,500
- ◯ $2,501 to $3,500
- ◯ $3,501 to $4,500
- ◯ $4,501 or more

35. How do you think you will obtain this money? (Please mark the approximate percent you expect to receive from each source. If you are not sure, try to make your best guess.) NOTE: The percents you mark should equal 100%.

	NONE	20%	40%	60%	80%	ALL
MY PAST SAVINGS	◯	◯	◯	◯	◯	◯
MY WORK (including summer and part time)	◯	◯	◯	◯	◯	◯
FAMILY (including all relatives)	◯	◯	◯	◯	◯	◯
LOANS, GRANTS, SCHOLARSHIPS	◯	◯	◯	◯	◯	◯
OTHER GOVERNMENT SOURCES OF MONEY such as social security, veterans' benefits, etc.	◯	◯	◯	◯	◯	◯

TOTAL SHOULD = 100%

36. If you think you will try to get a loan or grant, what have you done, or what will you do, to get such assistance? (Mark only one circle under "LOAN" and only one circle under "GRANT . . . . ")

	LOAN	GRANT OR SCHOLARSHIP
I have already applied	◯	◯
I will probably apply in the next 2 months	◯	◯
I will probably apply when I enroll in the school or program	◯	◯
I do not have enough information to apply	◯	◯

37. When you attend school will you: (Mark one in each column)

- ◯ attend school in your town
- ◯ attend school in nearby town
- ◯ attend school in distant town
- ◯ live at home
- ◯ live in a place of your own
- ◯ live in a dorm

38. Do you want a part time job on or near the campus where you plan to attend school?

- ◯ yes
- ◯ no

39. How will you get to your classes? (Mark one; if you are not sure, make your best guess)

- ◯ walk or bicycle
- ◯ my car or motorcycle
- ◯ car pool
- ◯ public transportation

40. What is your best estimate of the total amount of money you will consider borrowing for all the years of schooling you will attend? (Mark the one amount which is closest to your estimate.)

- ◯ I do not plan to borrow money
- ◯ less than $500
- ◯ $501 to $1,000
- ◯ $1,001 to $1,500
- ◯ $1,501 to $2,500
- ◯ $2,501 to $3,500
- ◯ $3,501 to $5,000
- ◯ $5,001 to $7,500
- ◯ $7,501 to $10,000
- ◯ $10,001 or more

41. If you indicated in question No. 35 that you will not seek financial assistance, why will you not do so? (Mark all that apply)

- ◯ I do not have enough information to apply
- ◯ I do not expect to need any financial help
- ◯ My family's income is too high
- ◯ My grades are not high enough
- ◯ I do not want to have to worry about repaying a loan

42. If you had complete freedom to choose (aside from grants or scholarships) which source of financial assistance would you prefer? (Mark one)

- ◯ earn it myself
- ◯ combination of work and a loan or grant
- ◯ student loan

43. Which form of loan repayment would you prefer? (Mark one)

- ◯ Repay the amount borrowed plus interest during the two years after I finish or leave school
- ◯ Repay more than the amount borrowed plus interest over a longer period of time after I finish or leave school
- ◯ Have all or part of the loan forgiven or excused by working in an occupation where there is a shortage of workers

IF YOUR MAJOR ACTIVITY NEXT YEAR WILL BE A JOB RATHER THAN CONTINUED EDUCATION, ANSWER THE FOLLOWING:

44. Next year will you (Mark one in each column):

- ◯ work in your home community
- ◯ work in nearby community
- ◯ work in distant community
- ◯ live at home
- ◯ live in a place of your own

45. Which of the following do you consider to be major obstacles to getting a job? (Mark all major obstacles)

- ◯ finding out which jobs are open
- ◯ knowing how to apply and fill out applications
- ◯ having the skills and knowledge needed to do the job
- ◯ knowing what I can do
- ◯ meeting work codes such as dress, appearance, time clocks
- ◯ others; list them below:

CENTER FOR STUDIES IN VOCATIONAL AND TECHNICAL EDUCATION, UNIVERSITY OF WISCONSIN-MADISON

The Center for Studies in Vocational and Technical Education at the University of Wisconsin-Madison was reorganized with the support of the Wisconsin Board of Vocational, Technical and Adult Education within the School of Education in 1971. The function of the Center is to serve the State of Wisconsin in a unique way by bringing the resources of the University to bear on identified problems in the delivery of vocational and manpower programs—vocational education, technical education, adult education, career education, manpower training—to citizens of all ages in all communities of the State. The Center focuses upon the delivery of services including analyses of need, target groups served, institutional organization, instructional and curriculum methodology and content, labor market needs, manpower policy, and other appropriate factors. To the extent that these goals are enhanced and the foci of problems widened to encompass regional and national concerns, the Center engages in studies beyond the boundaries of the State.

Merle Strong, Director
Roger Lambert, Associate Director
